50 Planting Partnerships to Boost Your Harvests

Charles Dowding

Learn the art of combining crops to improve growth, maximize space, and increase yields.

THE PITCH

- **TRANSFORMATIVE APPROACH:** First mainstream book to focus on interplanting, a revolutionary approach that plants together crops with different habits and growing timeframes, to maximise productivity
- **PERFECT AUTHOR:** Charles Dowding has perfected interplanting over 40 years and this book will resonate strongly with his 1.2 million followers and wider grow-your-own community
- **CHOICE COMPANIONS:** The book also covers companion planting to deflect pests and attract pollinators, debunking some myths around the topic on the way
- **PROVEN SUCCESS:** Interplanting for gardens stems from agricultural intercropping with its well-researched benefits, including improved yield, healthier soils, and reduction in pests and diseases

THE BOOK

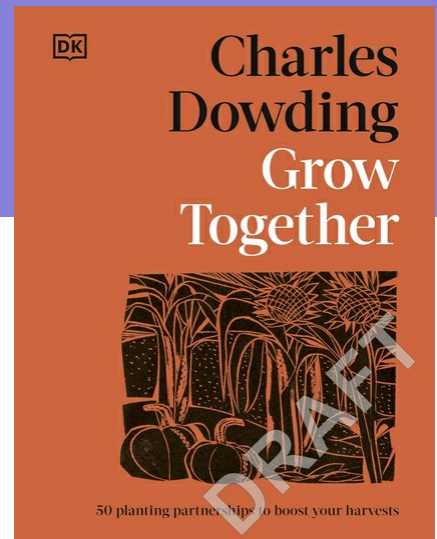

Getting the most from a veg patch is what all gardeners want. With a little forethought and planning, an approach that places different crops together, and in closer proximity than you might imagine, means you can grow more plants in the same area while creating healthy and beneficial plant communities.

No Dig guru Charles Dowding uses 40 years of growing experience to recommend which crops to grow successfully together, how to time it right, and how to harvest in particular ways, to grow the tastiest, pest-free crops as space-efficiently as possible. Carrots between lettuces, fennel between spinach, garlic interplanted with coriander, broad beans around asparagus, cucumbers between peas and strawberries: 50 different proven combinations are shared to help you get the most from growing crops in tune with the seasons, the soil community, and wider environment.

Grow Together is about more than simply planting two different crops side-by-side: there's succession planting, catch-cropping, cover-cropping, companion planting, planting to aid pollination, and multisowing. Charles explains them all and provides invaluable advice on how to succeed in each technique, with the correct timings and spacings, as well as the best varieties to grow.

THE AUTHOR

DK author Charles Dowding has proven his success in selling books to his audience: *No Dig* (2022) and *Compost* (2024) have channelled all his knowledge successfully into brilliant and popular books. Charles is the undisputed leader in no-dig gardening. From his home and garden in Somerset, he has been growing vegetables and fruit for more than 40 years. He's a market gardener (who still sells his produce locally to restaurants) as well as his social media, writing and course work.

THE PITCH

THE BOOK

Are you exhausted by the pressure to 'have it all'?

In a push and rush culture that rewards entrenched cultural narratives like the need to be exceptional and the drive to optimise, our relentless obsession with 'more' can often lead to chronic overperformance and burnout.

Life. Reclaimed provides a unique framework for understanding the root causes of this efficiency mindset and navigates the gap between the overwhelming pressure to excel and how to succeed in a way that keeps you sane, whole, and healthy.

Connecting overperformance to all areas of life, including love, family, and work, Pippa Grange introduces the idea of Regenerative Performance – a sustainable, cyclical approach to success that will help you shed performative behaviours, dismantle false goals, connect with your purpose, and liberate you from the productivity treadmill.

You will come away empowered, hopeful and ready to live the life you have always wanted, rather than merely performing the life you think you should have.

THE AUTHOR

Pippa Grange is a regenerative performance psychologist, coach, and storyteller with more than 25 years in the field working with some of the world's top performers across sport and industry. You may have seen her transformative work with the England men's football team as portrayed in the smash-hit national play and TV series 'Dear England'. Behavioural coach Eric Zimmer has been asking himself this question for years and in this, his debut book, he shares how forming healthy habits is not enough – we need to cultivate **wise habits** to be applied day by day.

Cole helps you discover which iconic rom-com movie represents you, how likely your sign is to go on *Love Island* to find love, and more, then sends you off with words of advice to help you transform every area of your life.

THE AUTHOR

Cole Prots is a free-spirited Gemini who has been studying astrology since he was 15 years old. Back then, he was only focused on sun sign astrology, but oh how far he has come! He currently lives by the mantra "there are no negatives in astrology. No bad placements. No bad aspects. No bad transits. Only opportunities to grow & learn more about ourselves." He is currently the resident astrologer for Smudge Wellness and writes *W Magazine*'s monthly astrology column.

- **VISUALLY TERRIFYING:** Packed with unsettling artworks, eerie photographs, and haunting artefacts

THE BOOK

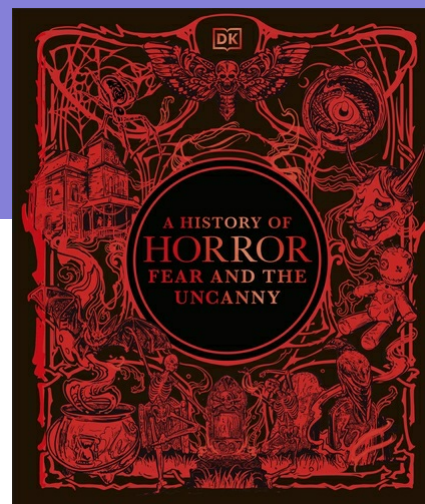

Take a step – if you dare – into the shadows and the story of our primal fascination with fear, terror, and the macabre.

This comprehensive and creepily illustrated guide explores the dark and eerie landscapes of horror down the centuries and across the world – from prehistoric death rituals and early monster myths to modern manifestations of the subject in art, literature, and film.

Discover how horror has evolved through the ages, beginning with the ancient visions of a hellish underworld. Encounter terrifying figures like Medusa and the Babylonian demon Pazuzu. Tread carefully through the medieval world, where a fear of the unknown stoked apocalyptic terror around the Black Death and gave rise to the demonology of the *Malleus Maleficarum*.

Delve into the folklore that gave birth to iconic creatures of the night – from vampires and werewolves to the Japanese Kappa water demon and the cannibalistic Wendigo of Indigenous American lore. Witness the emergence of Gothic literature, with the terrifying and genre-defining works of authors like Edgar Allan Poe and Mary Shelley, and learn how the 20th century saw a new wave of terror unleashed through silent films, Expressionist art, and the emergence of horror cinema – from gruesome “body horror” movies to the social commentaries of films like *Get Out*.

Whether you're a dedicated horror aficionado or a curious newcomer, this book is the ultimate guide to the subject... Prepare yourself for a thrilling – and chilling – journey into the heart of darkness.

- **AMAZING SCENES:** Detailed illustrations bring prehistoric animals and habitats to life
- **TIME TRAVEL:** A 12-hour clock covering 4.5 billion years marks the stages of Earth's evolution, with humans arriving 19 seconds to ago!
- **KEY SCIENCE TOPICS:** Important curriculum topics are explained, from biology (evolution, adaptation) to geography (volcanoes, tectonics, and more)

THE BOOK

If the age of Earth was scaled to 12 hours, humans would only have come into existence in the last 19 seconds.

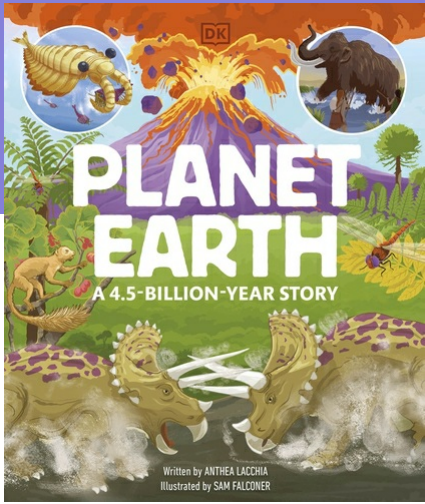

Twenty-two minutes ago, a meteorite hit Mexico's Yucatan Peninsula, wiping out (almost) all dinosaurs.

Across the aeons, Earth has been home to forest-dwelling mega-penguins, mile-high waterfalls in the Mediterranean, humongous glass sponge reefs, and many other fascinating sights.

This book provides snapshots of the most wonder-filled moments from our planet's vast history, as well as the science and geography that created them.

Written by an expert palaeontologist, each snapshot of another world is accompanied by awe-inspiring illustrations, maps of the ever-moving continents, and photos of comparable contemporary phenomena.

So dive back into deep time, and unlock the secrets of our planet's past.
