Handa Cheng

- **PERSONAL TOUCH:** Short, illustrated features incorporate chef's tips and musings on history and food in Chinese culture

THE BOOK

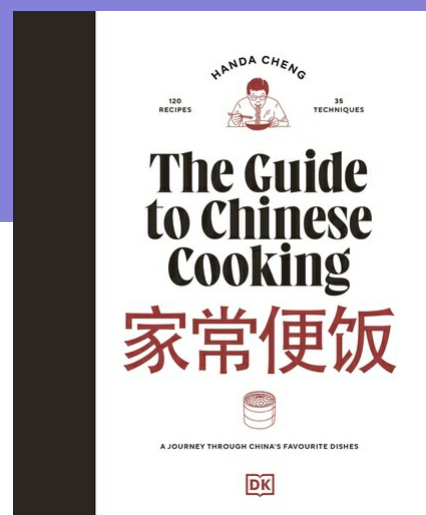

"There are seven essential things in life: firewood, rice, oil, salt, soy sauce, vinegar and tea." So goes the ancient Chinese proverb. So far, so familiar, perhaps ... but Handa Cheng is keen to change our perception of Chinese food, and shed light on a cuisine that is rich and varied, with unique ingredients, techniques and traditions.

In this comprehensive guide, Handa introduces the vastly different culinary regions of this immense country and their speciality dishes, from Mouth-watering chicken to Mapo tofu to Yu Xiang aubergine. From luxurious imperial fare to frugal vegetarian recipes of Buddhist monks, Handa distils 5,000 years of history and food culture into 14 simple chapters, with easy, fresh recipes that are packed with "good to know" tips and memories of his childhood in Wenzhou.

Step-by-step recipes help you learn the essentials, while 35 illustrated chef's tips and techniques uncover key ingredients and cooking methods. Feature pages get to the heart of each chapter: tofu as a blank page, the infinite possibilities of an egg, Chinese food and herbal medicine, street food and dining out, and even the ceremonial practice of tea-drinking. In The Guide to Chinese Cooking, Handa explores taste, texture, and spice to recreate authentic family dishes that are well-balanced and seasonal – all with an emphasis on everyday cooking and eating.

THE BOOK

Each area of a garden offers a different environment for plants, with differing levels of sun, soil, moisture, and more.

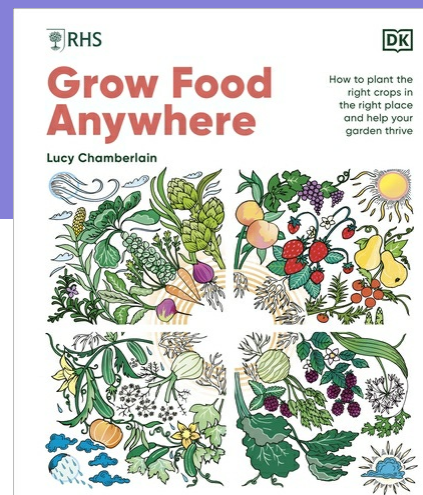

In this book, expert gardener and vegetable-grower Lucy Chamberlain breaks down the environments we may find in our gardens into seven zones, from sunny and sheltered through to shady and dry – as well as using indoor space.

Following the principle of “right crop, right place”, everyone can grow fruits and vegetables that will thrive in their space, large or small. Including varieties of vegetables, fruits, herbs, edible flowers, and crops in pots, there is something here for everyone – from favourites like chilis and figs to honeyberry, wasabi, agretti, and amaranth.

Learn how to identify and map the zones of your space, make the most of the natural conditions, collect water, use a greenhouse effectively, and understand the basics of what’s happening in the soil. With photographs of crops, diagrams of each zone, and a trouble-shooter guide to managing plant problems, this book will truly enable gardeners to grow food anywhere.

THE AUTHOR

Lucy Chamberlain has been cultivating edible produce since her teenage years, after being raised on her family's smallholding in Essex. She now grows more than 150 varieties of fruits, vegetables, and herbs year-round in her modern kitchen edible garden.
