

I'm Rich, You're Poor

How to Give Social Media a Reality Check

Shabaz Ali

Razor-sharp, laugh-out-loud satire of social media's mega-rich from 'The Voice of the Cost-of-Living Crisis' @ShabazSays

THE PITCH

- **TOPICAL:** 'The Robin Hood of TikTok' (Forbes, '23) is a voice of the cost-of-living crisis, predicted to be felt until as late as 2027 (The Big Issue, '23)
- **GROWING PLATFORM:** Author has a fast-growing following and celebrity fans including Taika Waititi, Fats Timbo and Laura Whitmore

THE BOOK

The world is full of books about how to be rich. This is *not* one of them.

Today, many of us are feeling the pinch - and being bombarded with portrayals of social media 'perfection' is making that pinch feel more like a punch.

We may know that social media - with all its billionaires and beauty queens - is just a **highlight reel**. So why is it still making most of us feel **so low**?

Comedian Shabaz Ali wants to help you see the funny side of social media again. Because while it *looks* nice to live up in an ivory tower, this book reminds us that it is much more fun to be part of the baying mob that surrounds it.

This **laugh-out-loud** deep-dive into social media's ridiculously rich, will help you love your own penny-pinched, rough-around-the-edges, extraordinarily ordinary life.

Why is art important? What's so great about it? In this book, you'll see the world through famous artists' eyes, learning what inspired them to make art. Did you know that early humans spent a great deal of time on their cave paintings? And that before cameras were invented, the only way to record your face was to sit for a portrait? Many artists, such as Vincent Van Gogh and Frida Kahlo, used art as a language to express their feelings, thoughts, and emotions.

What's the Point of Art? reveals how art has changed the world, one artistic movement at a time, and it is guaranteed to inspire, surprise, and entertain everybody who picks it up. If you want to learn why art has the power to be beautiful, shocking, entertaining, and even political, this is the place to start.

THE BOOK

Take the scenic route through the Americas

When it comes to unforgettable travel experiences, journeys through the Americas top our bucket list. Imagine a road trip across the US, cruising along the Amazon, or taking an epic train ride through the Canadian Rockies. Across this beautiful landmass, it's the journey, rather than the destination, that's always mattered the most.

Featuring over 150 inspirational entries, *Unforgettable Journeys The Americas* is a vibrant celebration of taking the scenic route. We've picked the best adventures across the Americas, from soaking up the oceanside scenery on a drive along the Pacific Coast Highway to sailing between sandy islands in the Caribbean. Of course, the big-hitters are covered - hiking the mammoth Appalachian Trail, driving along the iconic Route 66, and cruising past icy glaciers in Alaska and the Inside Passage - but we also take you off-the-beaten path, roaming Guyana's Kaieteur Falls, kayaking through Canada's Nahanni River, and navigating the twisting corners of the Hana Highway in Hawaii. We've organized the book by types of transport, so whether you're an avid hiker, cyclist or driver, or love to be on the water or on the rails, we've got you covered. It's time to take the slow road and truly appreciate all the Americas have to offer.

THE BOOK

"You'll always be mine."

The latest taunt from my stalker reminded me I was nothing more than a possession to my father, to the Reapers, to Archer D'Ath. Even to Kody and Steele. Princess Danvers-the prize.

His wife.

Archer D'Ath's wife.

I hate them. They lied to me. Over and over again. I knew they were lying, too, and I hate myself for letting it get this far. For falling for them despite what they did to me. For believing in the relationships I wanted so desperately to be real.

Fake.

It's all fake. And none of them will let me go. Archer and his boys think they control me. My stalker wants to possess me. I'm not an idiot-I know my newest allies are using me, too.

That's fine.

I'll use all of them. I'll use them to take back what's mine.

My life. My freedom. My name.

No one owns Madison Kate Danvers.

Three deadly challenges

When a trip into the forest to collect a rare mushroom for her research goes horribly wrong, biologist Callie Peterson finds herself falling through a fairy portal and straight into the arms of the Unseelie Fae prince. The dangerously unhinged and viciously handsome Unseelie Fae prince. He thinks she's an assassin sent by the humans to kill him, not a scientist, and he imprisons her in his realm—where unwillingly, unwittingly, his obsession with her begins to grow. Prince Mendax has never felt anything but loathing until his eyes met hers: this vile human assassin's. He believes she's here to kill him, and yet her beauty is a parasite that has mercilessly latched onto his mind and won't let go. He itches to feel her smooth skin, even though the Unseelie royals would rather burn than touch a human. It's a dangerous desire. If he does not destroy the girl soon, she may be the only thing capable of destroying him. Mendax needs to be rid of her—but he also needs to entertain his people. And so, he challenges Callie to three deadly trials. If she survives, she gains her freedom. If she doesn't? His wrath is only just beginning.

THE BOOK

I was warned about Tristan Cole.

"Stay away from him," people said. "He's cruel. He's cold. He's damaged."

It's easy to judge a man because of his past. To look at Tristan and see a monster. But I couldn't do that. I had to accept the wreckage that lived inside of him because it also lived inside of me.

We were both empty. We were both looking for something else. Something more. We both wanted to put together the shattered pieces of our yesterdays. Then perhaps we could finally remember how to breathe.

She had no idea what she'd done to earn their hatred or what dangerous secrets she may have uncovered.

Until now.

Peeling back layer upon layer of the mystery surrounding her origins, Keira has finally learned that the strange masked men work for Artec, an organization profiting off spectral energy produced by hundreds of chained, tormented souls. Their goal is to spread their macabre cemeteries across the world, using the agony of the dead to extend their power and reach—and only Keira and her loyal group of friends can stop them. But there are still mysteries to uncover in Keira's foggy memories, and as she prepares to fight for the souls of the tormented dead, what she doesn't know about her own past may come back to haunt her.

42 Reasons to Hate the Universe (And One Reason Not To)

Chris Ferrie, Wade David Fairclough, Byrne Laginestra

From bestselling author Chris Ferrie comes an out of this world pop science space book on how the universe is, indeed, trying to kill us all

THE PITCH

- **Acclaimed author:** Chris Ferrie is the #1 bestselling science author for kids, with more than 1 million books sold worldwide, proving his ability to effectively communicate scientific ideas to the masses
- **Popular nonfiction space:** Readers of Randall Munroe's monumental "What If" series, which has sold almost 1 million books worldwide, and books such as *We Have No Idea* will be captivated by Ferrie's wit and humor, welcoming his work into the science space
- **Science writing with a twist:** Ferrie offers a fresh take on the "how does the universe work" category that not only adds humor about our impending doom, but sneakily teaches readers the science of the universe in a convincing and effective way.
- **Author Location:** Chris Ferrie is an award-winning physicist who works at the University of Technology Sydney in Australia

THE BOOK

If you've always suspected the universe was out to get you... you were right!

Yes, the universe we live in is cosmically beautiful and mysterious and all that crap. But it's also a bit of an asshole. After all, remember that you are just a group of atoms structured in a specific way for barely long enough to try to understand this thing we call existence. Those atoms could just have easily been used to make the dog shit you're cleaning off your shoe or the mold that grows on your bread! The fact is, when you zoom out to look at the universe and how it functions, you'll see that it's usually not in our favor, and many of the laws of physics are actively working against our survival. In this book, you'll discover why:

You're an aging mutant
Invisible rays are melting our genetic code
The Earth is covered in explosive pimples
Literally everything is poisonous
And more true and terrifying scientific facts!

But don't worry! While it's true that there are (at least) forty-two grudges to hold against the universe, the good news is that there is also one very good reason to forgive them all and embrace the wild, improbable fact that we are alive (for now) and we should take advantage of it while we can. *42 Reasons to Hate the Universe (And One Reason Not To)* is a hilarious, no-holds-barred exploration of all the reasons we shouldn't exist-but somehow do anyway. Rooted in scientific research but written simply so that evolved apes such as ourselves can understand where the heck we came from and where we're likely going, this book is for all the nerds and nihilists who know they're going down in the end but want to enjoy the rollercoaster ride of existence on the way.

THE BOOK

The dark story behind the bright lights of Tinseltown

From the outside, Hollywood starlet Lana Turner seemed to have it all—a thriving film career, a beautiful daughter, and the kind of fame and fortune that most people could only dream of. But when the famous femme fatale began dating mobster Johnny Stompanato, thug for the infamous west coast mob boss Mickey Cohen, her personal life became violent and unpredictable. Lana's teenage daughter, Cheryl, watched her beloved mother's life deteriorate as Stompanato's intense jealousy took over. Eventually, the physical and emotional abuse became too much to bear, and Lana attempted to break it off with Johnny—with disastrous consequences. The details of what happened that fateful night remain foggy, but it ended in a series of frantic phone calls and Stompanato dead on Lana's bedroom floor, with Cheryl claiming to have plunged a knife into his abdomen in an attempt to protect her mother. The subsequent murder trial made for the biggest headlines of the year, its drama eclipsing every Hollywood movie.

New York Times bestselling author Casey Sherman pulls back Tinseltown's velvet curtain to reveal the dark underbelly of celebrity, rife with toxic masculinity and casual violence against women, and tells the story of Lana Turner and her daughter, who finally stood up to the abuse that plagued their family for years. *A Murder in Hollywood* transports us back to the golden age of film and illuminates one of the 20th century's most notorious true crime tales.

What the Children Told Us

The Untold Story of the Famous "Doll Test" and the Black Psychologists Who Changed the World

Tim Spofford

For readers of *The Immortal Life of Henrietta Lacks* and *Hidden Figures*, *What the Children Told Us* tells the story of an iconic partnership that set the stage for decades of civil rights activism

THE PITCH

- **Market:** Readers continue to seek out stories of forgotten figures from history, particularly the stories of Black people and other POC whose influences have been overlooked
- **Author expertise:** The author has devoted more than a decade to researching and writing the book and has exclusive access to the Clarks' family photos and documents
- **Incredible read:** Well-drawn characters, an immersive setting, and important historical events and figures woven into the story make this an unputdownable read for fans of serious narrative history
- **Author location:** Tim Spofford lives in St. Petersburg, Florida and Lee, Massachusetts

THE BOOK

Does racial discrimination harm Black children's sense of self?

The Doll Test illuminated its devastating toll.

Dr. Kenneth Clark visited rundown and under-resourced segregated schools across America, presenting Black children with two dolls: a white one with hair painted yellow and a brown one with hair painted black. "Give me the doll you like to play with," he said. "Give me the doll that is a nice doll." The psychological experiment Kenneth developed with his wife, Mamie, designed to measure how segregation affected Black children's perception of themselves and other Black people, was enlightening and horrifying. Over and over again, the young children—some not yet five years old—selected the white doll as preferable, and the brown doll as "bad." Some children even denied their race. "Yes," said brown-skinned Joan W., age six, when questioned about her affection for the light-skinned doll. "I would like to be white."

What the Children Told Us is the story of the towering intellectual and emotional partnership between two Black scholars who highlighted the psychological effects of racial segregation. The Clarks' story is one of courage, love, and an unflinching belief that Black children deserved better than what society was prepared to give them, and their unrelenting activism played a critical role in the landmark *Brown v. Board of Education* case. The Clarks' decades of impassioned advocacy, their inspiring marriage, and their enduring work shines a light on the power of passion in an unjust world.

Her ex-best friend, Natasha, has offered to pick Lily up on her way back from Portland, though they're barely on speaking terms. As it turns out, Natasha's also giving a ride to Elke Azizi, the girl Lily got expelled from their school four years ago. Elke hasn't forgotten, and neither has Natasha.

It's getting tense in the car, and it's not just about the past. There's smoke in the air, and with the wildfires nearby, staying on the road is becoming riskier by the hour. When Natasha and Elke decide to take a detour, Lily hopes it'll get them out of danger. She has no idea, though, what her former friends have planned for her.

But as night comes, the plans change again when it becomes all too clear that leaving the main road was a mistake. Now the three of them are trapped in the woods under a burning sky, with no easy way out. To survive, Lily must depend on Elke and Natasha-but after all that's happened, can she trust them with her life?
