THE BOOK

The debut non-fiction book from bestselling author and illustrator Chris Haughton that takes readers on an illuminating journey through the evolution of knowledge and communication.

We are used to technology improving all the time. Next year we will have better phones, cars, and technology. What is it that makes technology improve rather than stay static or even fall into decline? The answer is information. If we are able to record knowledge we can collect and share it. We can continue adding to it and it grows and grows. It hasn't always been like this. For a long time, human progress was very slow or static. At some points it felt like our progress even ran backwards! But the ability to record information in the form of writing and collecting data has caused an explosion of technological progress. This book tells the story of how we came to collect information, and what it means for us.

From the world renowned Chris Haughton, the creator of such books as OH NO, GEORGE!, A BIT LOST, and SHHH, WE HAVE A PLAN! *The History of Information* is a one-of-a-kind book that explores the history of information throughout human history.

However, sometimes – just sometimes – we get a small glimpse into what their lives are like.

Discover what life in space is *really* like in this fascinating read authored by real-life astronaut Samantha Cristoforetti. Andi's diary entries share the fun of slow cartwheeling around a space station and watching 16 sunrises and sunsets every day, while her reports to mission control will have you learning about how conducting science experiments in space can help humanity.

Can Andi do enough to show that she's capable of becoming a fully-fledged astronaut and commanding her own mission one day? Pull on your space helmet, strap on your oxygen tank, and dive into *The Astronaut Diaries* to find out!

THE AUTHOR

Samantha Cristoforetti is the first European female commander of the International Space Station and the first European woman to complete a spacewalk. Since 2012, Samantha has been part of two missions: during her latest *Minerva*, Samantha supported numerous European and international experiments in orbit.

Outside of space, Samantha is a UNICEF ambassador and an avid reader with a passion for science and technology and an equal interest in humanities. She enjoys learning foreign languages and occasionally finds the time to hike, scuba dive or practice yoga. When not travelling for work, Samantha lives with her partner Lionel and their two children near ESA's Astronaut Centre in Cologne, Germany.

THE BOOK

"This book unravels the mysteries behind humanity's greatest masterpieces." — Adam Grant, #1 *New York Times* bestselling author of *Think Again*

Discover the secret method used to build the world...

For millennia, humans have used one simple method to solve problems. Whether it's planting crops, building skyscrapers, developing photographs, or designing the first microchip, all creators follow the same steps to engineer progress. But this powerful method, the "engineering method", is an all but hidden process that few of us have heard of—let alone understand—but that influences every aspect of our lives.

Bill Hammack, a Carl Sagan award-winning professor of engineering and viral "The Engineer Guy" on Youtube, has a lifelong passion for the things we make, and how we make them. Now, for the first time, he reveals the invisible method behind every invention and takes us on a whirlwind tour of how humans built the world we know today. From the grand stone arches of medieval cathedrals to the mundane modern soda can, Hammack explains the golden rule of thumb that underlies every new building technique, every technological advancement, and every creative solution that leads us one step closer to a better, more functional world. Spanning centuries and cultures, Hammack offers a fascinating perspective on how humans engineer solutions in a world full of problems.

Perfect for readers of Adam Grant and Simon Winchester, *The Things We Make* is a captivating examination of the method that keeps pushing humanity forward, a spotlight on the achievements of the past, and a celebration of the potential of our future that will change the way we see the world around us.

Wanted: Toddler's Personal Assistant

How Nannying for the 1% Taught Me about the Myths of Equality, Motherhood, and Upward Mobility in America

Stephanie Kiser

Saddled with crushing student debt, Steph Kiser jumps head-first into the lucrative but unglamorous and exhausting world of nannying for New York City's richest families, immersing herself in a world in stark contrast to her own impoverished childhood, in this emotional and insightful new memoir

THE PITCH

- **A millennial take in the memoir space:** A fresh and fascinating millennial take on the behind-the-scenes career memoir genre, for readers of *Maid* and *Primates of Park Avenue*, sure to attract a wide audience
- **A trending topic:** "Nannytok" has over 160M views, and the intrigue of what working for the uber rich is like is rampant on the internet
- **A highly accessible and commercial read:** This book has the bingeable, can't-look-away propulsion that is reminiscent of today's most popular fiction titles
- **Perfect for book clubs:** Book clubs will enjoy diving into discussions about the important societal issues raised in this book, such as privilege, racism, and the challenges of working motherhood
- **Author/story location:** The author and story are both based in New York City, New York

THE BOOK

What are the lives of America's richest families really like? Their nannies see it all...

When Stephanie Kiser moves to New York City after college to pursue a career in writing, she quickly learns that her entry-level salary won't cover the high cost of living—never mind her crushing student loan debt. But there is one in-demand job that pays more than enough to allow Stephanie to stay in the city: nannying for the 1%. Desperate to escape the poverty of her own childhood and jump social classes, Stephanie falls into a job that hijacks her life for the next seven years: a personal assistant to toddlers on Manhattan's Upper East Side.

At first, nannying seems like the perfect solution—the high pay covers Stephanie's bills, and she's surprised by how attached she becomes to the kids she cares for, even as she gasps over Prada baby onesies and preschools that cost more than her college tuition. But the grueling twelve-hour days leave her little time to see her friends, date, or pursue any creative projects that might lead to a more prestigious career. Soon the shiny allure of the seemingly-glamorous job begins to dull as Stephanie comes to understand more about what really happens behind the closed doors of million-dollar Park Avenue apartments—and that money doesn't guarantee happiness.

Wanted: Toddler's Personal Assistant is alternately poignant and funny, a portrait of a generation of Americans struggling to find work they love balanced against the headwinds of global uncertainty, overwhelming student loans, and an economy stacked against anyone trying to work their way up from the bottom. In this unputdownable memoir, Stephanie chronicles her journey from newbie

Life Lessons from a Parasite

What Tapeworms, Lice, and Roundworms Can Teach Us About Humanity's Most Difficult Problems

John Janovy Jr.

An exploration of the most common life form on Earth—parasites—and how they provide insight into humanity's most difficult problems

THE PITCH

- **Exciting addition to the pop-science shelf:** The natural sciences, "weird" science, and pop-science are ever popular with readers, and this dives into a little explored, fascinating topic
- **A little idea within the big picture:** This project takes a tiny topic—parasites—to hook the reader and uses it to illuminate life's biggest questions, in the vein of Merlin Sheldrake's *Entangled Life* (but mission driven!)
- **Timely topics viewed through a new lens:** *Life Lessons* touches on ever-relevant, hot button issues like global pandemics, misinformation, and nationalism, using examples learned from the world of parasites to provide possible solutions
- **Author location:** John Janovy, Jr. lives in Nebraska

THE BOOK

"In nature, as in society, the parasites outnumber the hosts. John Janovy Jr. offers the parasites' view of this situation. The result is smart, funny, and all too revealing." – Elizabeth Kolbert, staff writer for *The New Yorker* and *New York Times* bestselling author of *The Sixth Extinction*

The answers to life's biggest questions can be found by looking at the little things...

Though you may not be able to see them with the naked eye, parasites—minuscule life forms that live inside other organisms—inhabit our everyday lives. From headlice to bird droppings, litterboxes to unfiltered water, you have brushed up against the most common way of life on our planet.

In this unique book, John Janovy Jr., one of the world's preeminent experts on parasites, reveals what can humans learn from the most reviled yet misunderstood animals on Earth: lice, tapeworms, flukes, and maggots that can eat a lizard from the inside, and how these lessons help us negotiate our own complicated world. Whether we're learning to adapt to adverse conditions, accept our own limitations, or process new information in an ever-changing landscape—we can be sure a parasite did it first.

At once peculiar and profound, *Life Lessons from a Parasite* makes a case for using knowledge of the natural world, with all its wonderful mysteries and quirks, to tackle our worst problems.

Remi doesn't want to believe it, especially after Dane sews up a gash in her thigh and steals a kiss in payment—a kiss that makes it hard to walk for reasons that have nothing to do with an injured leg.

Our lives are a collection of moments. Some full of yesterday's hurts. Some full of tomorrow's promises.

I've had many moments in my lifetime: moments that changed me, challenged me. Moments that scared me and engulfed me. But the biggest ones—the most heartbreaking and breathtaking ones—all included him.

I was ten years old when I lost my voice. A piece of me was stolen away, and the only person who could truly hear my silence was Brooks Griffin. He was the light during my dark days, the promise of tomorrow, until tragedy found him. Tragedy that eventually drowned him in a sea of memories.

This is the story of a boy and girl who loved each other, but didn't love themselves. A story of life and death. Of love and broken promises.

Of moments.

THE BOOK

Gemma O'Donnell was incensed when she wasn't the first woman to win the PRCA (Professional Rodeo Championship Association) buckle for bronc riding. This year, she heads out on the PRCA ProRodeo Tour burning to be the second.

First stop is Cody, Wyoming where her stiffest competition is Trace Coleman, who already has a jump on her. A tall, dark-haired cowboy with a sexy grin and a swagger, he doesn't really give a damn about the trophy belt buckle—he wants the purse to buy a ranch he has his eye on. He damn sure doesn't have time for a sassy bit of Irish baggage who can evidently ride anything with four legs and make anything with two legs want to take her to bed.

Gemma wins a few, Trace wins a few. In the end they both qualify for the final cut in Las Vegas. But when it comes down to the wire, only one can win the bronc-riding competition and take home one helluva prize. But in this competition, it just might be loser takes all...

THE BOOK

Twelve years ago, tragedy struck a sleepy Texas town. Only a small number of those impacted survived—a group the media dubbed The Ones Who Got Away. This is their story.

HER SECRET SHAME: The world knows Rebecca Lindt as a survivor, but that impression would crumble if people discovered her secret...and realized she didn't deserve to be the one who got away. But nothing can change the past, so she's thrown herself into her work. She can't dwell if she never slows down.

HIS UNCERTAIN FUTURE: Wes Garrett is trying to get back on his feet after losing his dream restaurant, his money, and half his damn mind in a vicious divorce. But when he intervenes in a mugging and saves Rebecca—the attorney who helped his ex ruin him—his simple life gets a hell of a lot more complicated.

Their attraction is inconvenient and neither wants more than a fling. But when Rebecca's secret is put at risk, both discover they could lose everything, including the one thing they never realized they needed: each other.

Meet Carrie Adams: Serious. Disciplined. Focused. But as an aspiring actress, she's at the mercy of casting directors who barely glance at her headshot before making snap judgments about her talent based solely on her looks. She feels powerless...until one night she goes from snarling at her obnoxiously attractive coworker (musician-slash-bartender Nick Stokes) to wanting to kill him. Literally.

Turns out Nick has become LA's latest vampire and she is his chosen Slayer... a decidedly unwelcome job that comes with an overnight super-bodybuilder-buff physique, the ability to conjure a sword made of fire, and a new gang of supernatural enemies out for her blood. Nick swears he'll help her. Carrie swears she'll figure out how to help herself.

But in a Hollywood-bright world of typecasting, can a Slayer and her sworn vampire nemesis break free of their assigned roles...and discover the deeper emotions there for the staking?

Doctor Kal Anderson assumes his heart worked at some point. But at thirty-two years old, the organ in his chest seems to play a mechanical role at best. His cold, emotionless existence gives him an edge as a fixer and in-house physician for the Mafia, while his judgment is impartial and complication-free.

Until Elena Ricci, his boss's twenty-year-old daughter.

After admiring the heartless doctor from afar most of her life, Elena catches him in a moment of weakness, and the pair shares a night of passion as they attempt to work each other from their systems. Only, the night seems to have the opposite effect. Elena is no longer a simple temptation to Kal, but a necessity.

An obsession.

One he won't let anyone stand in his way of—even if that means crashing her wedding to another man, forcing her hand in marriage, and stealing her away to the corrupt island he resides on.

Alone with the man of her nightmares, Elena starts to chip away at the layers of ice surrounding his hardened heart. But the warmth and depravity from her new husband may not be worth the secrets unveiled, or the lives that will forever be altered.

THE BOOK

From the author of *The Perfect Place to Die* and *Don't Go to Sleep* comes another chilling horror that explores the eerie story of America's first serial killer family.

Warren Bullock always thought he was a decent person. But lately he's been haunted by a sinister voice in his head urging him to commit unspeakable acts of violence against the people around him.

And then the rumors start... There have been a string of disappearances in southeastern Kansas, and his father's friend is one of the missing travelers. When Warren's father leaves to investigate and doesn't return, Warren knows this is his chance to prove that he is stronger than his darkest impulses.

As he makes his way through Kansas, he finds himself at a suspicious inn run by the Benders, a family with deeply unsettling mannerisms. They watch every move he makes, stand over him in his sleep, and the daughter seems to be able to see into both the past and future.

As he delves further into the disappearances, he realizes one or all of the Benders may be responsible for all the missing people—and might be the reason his father never came home. It's up to Warren to set things right, even if that means giving into the voice he has been working so hard to ignore.
